¹ Where multiple houses were conveyed to a single purchaser in one instrument, the sale price for each house is calculated by dividing the total purchase price by the number of houses included in the sale. For example, 1541 Lee Place was one of eight houses that were bundled and sold together for \$8,000.00. The table therefore reflects a purchase price of \$1,000.00 for the house at 1541 Lee Place.
